DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-92 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-79 of U.S. Patent No. 6,554,368.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the claim differences are minor changes which are completely obvious: for example, claim 1 is somewhat broader in that it calls for "a mining machine" rather than a "tunnel boring machine".

3. It is noted that this application is a continuation of 10/272,852, which is a divisional of the application which became U.S. Patent number 6,554,368; however the claims in this application are not commensurate in scope with the claims in the parent application at the time of the restriction in that parent case.

4. It is noted that the PTO 1449 filed 7/23/03 indicates that there are 5 sheets, however only 4 sheets (sheets 1-4) have been identified.
